

Threat Assessment

Step-by-step Workplace Assessment of Violence Risk (WAVR-21) methodology to help you objectively assess the warning signs linked to workplace or campus violence.

In partnership with the creators of the WAVR-21

A constant challenge in conducting violence risk assessments is determining whether there is a legitimate risk of violence, without causing fear or disruption in the workplace. Your goal is to create and maintain a safe environment for the staff, students, customers or patients within your organization. That's why we partnered with the psychologists behind the Workplace Assessment of Violence Risk (WAVR-21) methodology to create a collaborative, structured tool for threat assessment teams.

The WAVR-21 Threat Assessment app combines the professional judgement and scientific research behind the WAVR-21 methodology with Resolver's industry leading case management software.

Protect What Matters™ with the WAVR-21 Threat Assessment app

A Structured Approach

Follow the structured, evidence-based WAVR methodology to assess the 21 violence risk and protective factors associated with workplace or campus intended violence.

Improve Team Collaboration

Keep your team on track using the app's powerful workflow tool to automate tasks, reminders, and notifications.

Secure Sensitive Data

The app is browser based and uses account security settings and permissions to keep assessments, cases and investigations 100% confidential and secure.

Complete Case Documentation

Don't let critical information slip through the cracks. Easily organize your assessments, cases, and records all in one place for complete and thorough case documentation.

You're In Good Company

Over 1,000 of the world's largest organizations use our cloud software to protect what matters.
